

LEANID MATSKEVICH

Frontend Developer

ABOUT ME

I am a Frontend Developer building modern and user-friendly web applications using **JavaScript (ES6+), TypeScript, React, and Next.js**. Skilled in creating responsive interfaces, integrating REST APIs, and optimizing application performance.

My priorities are **clean code, great user experience, and continuous learning**. I am ready for new challenges, open to working in a strong team, and eager to grow as a professional while creating products that bring real value to users.

LANGUAGES

Belarusian — Native

Russian — Fluent

English — Improving proficiency (A2)

EDUCATION

RS School Courses JS/FE Pre-School

2021 — 2021

Status: Completed with [certificate](#)

RS School Courses JavaScript/Front-end 2022Q3

2022 — 2023

Status: Completed with [certificate](#)

RS School Courses React 2025 Q1

2025 — 2025

Status: Completed with [certificate](#)

WORK EXPERIENCE

Frontend Developer [Freelance]

2023 — Present

- Developed and deployed responsive, scalable interfaces using React, Next.js, and TypeScript
- Configured and optimized frontend environments (Vite, ESLint, Prettier, SCSS modules)
- Built reusable UI components and SCSS mixins to streamline development
- Integrated calculation logic and visualized engineering data for better user experience
- Automated workflows with templates, documentation, and Storybook

SKILLS

Frontend Development:

React, Redux, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS, Responsive Design

CONTACT DETAILS

Tooling & Workflow:

Vite, ESLint, Prettier, Git/GitHub, Husky, lint-staged, Storybook

Testing:

Vitest, Jest, RTL, Debugging with DevTools

Methodologies & Soft Skills:

Agile/Scrum, Code Review, Team Collaboration, Technical Documentation

PROJECTS

Weather App — [Live Demo](#)

Stack: Next.js 15, TypeScript, Tailwind CSS, ESLint, Prettier, Husky, lint-staged, SSR, SSG, API Routes, Env Variables, Vercel.

Description:

Developed a responsive weather forecasting application using Next.js with TypeScript and Tailwind CSS. Implemented Server-Side Rendering (SSR) and Static Site Generation (SSG) for high performance and SEO optimization. Integrated API Routes for fetching real-time weather data and secured environment variables for API keys. Configured ESLint + Prettier for consistent code quality and Husky + lint-staged for pre-commit validation.

Result: Fast page loading, clean UI, secure data flow, and maintainable codebase.

My ToDo App — [Live Demo](#)

Stack: JavaScript (ES6+), HTML5, CSS3, LocalStorage, GitHub Pages.

Description:

Created a task management application for organizing daily activities. Implemented CRUD operations (create, edit, delete, mark as completed) using vanilla JavaScript and LocalStorage for persistent data storage. Focused on a clean UI/UX and responsive design principles.

Result: Improved understanding of component structure,

DOM manipulation, and local state management in client-side applications.

REST Client — [Live Demo](#)

Stack: Next.js, TypeScript, Tailwind CSS, ESLint, Prettier, Husky, REST API, Vercel.

Team Role: Team Lead (coordinated a team project at RS School).

Description:

Led the development of a REST API testing tool inspired by Postman. Implemented user authentication, request builder, and API response visualization. Managed code reviews, task distribution, and CI setup. Ensured consistent coding standards and documentation across the team.

Result: Strengthened leadership and collaboration skills, enhanced understanding of API workflows and team-based development using modern React/Next.js tools.

Learning Results — [Live Demo](#)

Stack: JavaScript (ES6+), HTML5, CSS3, Chart.js, LocalStorage, GitHub Pages

Description:

Built an interactive progress-tracking app that visualizes learning achievements using dynamic charts.

Implemented data visualization via Chart.js, persistent storage via LocalStorage, and adaptive layout.

Result:

Gained experience in front-end data visualization, DOM interactions, and client-side data handling.

Agency.Ai — [Live Demo](#)

Stack: React, Tailwind, Git, GitHub, Framer Motion, Netlify

Description:

Developed a React-based SPA using TypeScript, Tailwind CSS, and Framer Motion. Implemented responsive UI, animations, and a clean component architecture.

Result:

Gained hands-on experience building a React-based SPA

using TypeScript, Tailwind CSS, and Framer Motion. Strengthened skills in responsive UI development, component architecture, type-safe coding, and animation implementation. Acquired practical knowledge in build configuration, performance optimization, and deploying applications on Netlify.
